EE25BTECH11062 - Vivek K Kumar

Question:

Solve for the following system of linear equations:

$$\begin{aligned}\mathbf{X} + \mathbf{Y} &= \begin{pmatrix} 7 & 0 \\ 2 & 5 \end{pmatrix} \\ \mathbf{X} - \mathbf{Y} &= \begin{pmatrix} 3 & 0 \\ 0 & 4 \end{pmatrix}\end{aligned}$$

Solution: The given system can be represented as:

$$\begin{pmatrix} \mathbf{I} & \mathbf{I} \\ \mathbf{I} & -\mathbf{I} \end{pmatrix} \begin{pmatrix} \mathbf{X} \\ \mathbf{Y} \end{pmatrix} = \begin{pmatrix} 7 & 0 \\ 2 & 5 \\ 3 & 0 \\ 0 & 4 \end{pmatrix} \quad (0.1)$$

Solving the equation,

$$\begin{pmatrix} \mathbf{X} \\ \mathbf{Y} \end{pmatrix} = \begin{pmatrix} 1 & 0 & 1 & 0 \\ 0 & 1 & 0 & 1 \\ 1 & 0 & -1 & 0 \\ 0 & 1 & 0 & -1 \end{pmatrix}^{-1} \begin{pmatrix} 7 & 0 \\ 2 & 5 \\ 3 & 0 \\ 0 & 4 \end{pmatrix} \quad (0.2)$$

$$\begin{pmatrix} \mathbf{X} \\ \mathbf{Y} \end{pmatrix} = \frac{1}{2} \begin{pmatrix} 1 & 0 & 1 & 0 \\ 0 & 1 & 0 & 1 \\ 1 & 0 & -1 & 0 \\ 0 & 1 & 0 & -1 \end{pmatrix} \begin{pmatrix} 7 & 0 \\ 2 & 5 \\ 3 & 0 \\ 0 & 4 \end{pmatrix} \quad (0.3)$$

$$\begin{pmatrix} \mathbf{X} \\ \mathbf{Y} \end{pmatrix} = \begin{pmatrix} 5 & 0 \\ 1 & 9/2 \\ 2 & 0 \\ 1 & 1/2 \end{pmatrix} \quad (0.4)$$

Hence, the matrices are given by

$$\mathbf{X} = \begin{pmatrix} 5 & 0 \\ 1 & 9/2 \end{pmatrix} \quad (0.5)$$

$$\mathbf{Y} = \begin{pmatrix} 2 & 0 \\ 1 & 1/2 \end{pmatrix} \quad (0.6)$$

Matrix	Value
X	$\begin{pmatrix} 5 & 0 \\ 1 & 9/2 \end{pmatrix}$
Y	$\begin{pmatrix} 2 & 0 \\ 1 & 1/2 \end{pmatrix}$
